

WSU worker dies in crash

By JIM STORMENT

Daily Evergreen Staff

A WSU employee was killed on the Moscow/Pullman highway at 4:45 a.m. Thursday when her car collided with a cement truck by the rock quarry about a half-mile west of Pullman.

Christine E. Jones, 38, died instantly when her Pontiac T-1000 crossed the center line and was hit by a Central Premix truck, Washington State Patrol officers reported.

Daniel L. Welch, driver of the truck, suffered bruises and minor injuries.

The Pullman fire department was later contacted to get into the Pontiac with special equipment.

Trooper Terry Parker of Wash-

ington State Patrol said workers had to cut the top of the car off, move the steering column back and stretch the door to reach Jones.

"It was probably one of the most heavily impacted accidents I've seen, at least for a few years," Parker said.

Investigation continues as to why Jones entered the oncoming lane, but any reasons now are only speculation, Parker said.

Jones, a Pullman resident and administrative secretary at WSU's Agricultural Research Center, strayed into the path of the truck on a curve to the right as she traveled westbound on State Route 270.

Accident reconstruction confirmed that the collision took

place in the eastbound lane, according to the State Patrol.

The bumper height of the truck probably contributed to the nature of the damage, Parker said.

Damage to the truck was minimal and mostly confined to the base, while about three quarters of the car was ripped and crushed severely.

Welch, a 30-year-old Moscow resident, was walking and clearly not hurt when police arrived, Parker said.

The wheels and leaf springs of the truck received most of the damage.

Officers spent about five hours clearing the highway while traffic was rerouted through the area on the Moscow/Pullman Airport Road.

PARIS VISION

Where quality and convenience are at your service

- Complete examination and glaucoma testing
- Instant fitting of most contact lenses
- Discounts for students and senior citizens
- Bifocal contact lenses now available
- Children's exams and vision therapy
- Evening and Saturday appointments available
- Large selection of designer frames and sunglasses

In office lab with 1 to 2 day service on most eyeglass orders.

1 Free Set of Soft Contact Lenses with Purchase of Basic Contact Lens Package
